## Self Definition

I'm easy going and social. My hobbies are mostly sport oriented. Through sports I've learned to be dedicated and patient to see progress from hard work. I'm not afraid to ask for help since I love learning new things but I also like helping others whenever I can.

## Strength

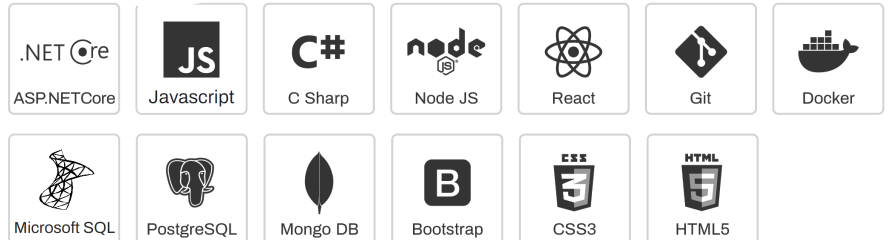

I'm proficient in multiple programming languages and frameworks including ASP.NET Core, JavaScript, Node.js, and React. I have a strong understanding of SQL databases and have experience working with them. I'm also skilled in using Git and GitHub for version control and for collaborating with other developers. I'm good at working alone or as part of a team.

## Mentor Opinion

"Dorián is a superb coder with an exceptional eye for detail. He has a knack for understanding complex abstractions and an unconventional love for structuring his projects. Working with Dorián a joy and his distinctive British accent adds an extra touch of class to every conversation. He's definitely one of the brightest students I've had the pleasure of working together with. I have no doubt that he'll excel in any project he takes on, and I look forward to seeing where his talents will take him in the future."

— *Róbert Kohányi, mentor*

## Hard Skills

## Recent Projects

### MENTAL HEALTH JOURNAL

<https://github.com/lilifarkas/mental-health-journal>

An app for people to keep track of their time and set tasks for themselves. This project uses ASP.NET web APIs, React and Docker.

### TASK MANAGER

<https://github.com/dorian-sz/TaskManager-CRUD-app>

A CRUD app where the user can register and create tasks for themselves. This project uses ASP.NET web APIs, xUnit, React, MSSQL and Docker

### PORTFOLIO

<https://github.com/dorian-sz/Portfolio-Dorian-Szatmari>

My portfolio page's repository which was created with React, Javascript and CSS. The animations were made using CSS Animations
